

ANNOUNCING THE

Equitable Care

MODULE

A PART OF ENCOR FOR ELECTRONIC MEASURES

Monitor Your eCQM Results Through an Equity Lens

Stratify Your Existing eCQMs

Calculate Your Social Drivers of Health (SDOH) Measures

Capture Your Hospital Commitment to Health Equity (HCHE) Measure

About the module

To address the new CMS IQR and TJC health equity requirements, Medisolv has released a new module as a part of the ENCOR for Electronic Hospital Measures software. Healthcare organizations can now stratify their eCQM measures by race, ethnicity, gender, and payer. New dashboards show stratified hospital eCQM performance and variance from overall rate. Social Drivers of Health (SDOH) are calculated as eCQMs and automatically display results. Monitor the new Hospital Commitment to Health Equity measures from one platform. Talk to us today about our Equitable Care module. Early adopter pricing available for current clients.

The screenshot shows the ENCOR Equitable Care dashboard. At the top, there are navigation links: Home, Clinician, Hospital, Equitable Care, Value Sets, Contact Us, and Links. The dashboard title is "Equitable Care" and it shows the selected hospital as "Regional Health Center (CCN - 1234567)" and the date range as "Quarter" for "Q1 2022". Below this is a table with columns for Race, Gender, Ethnicity, and Financial Class. The main table has columns for CMS ID, TJC ID, Measure Name, Overall Rate, and then columns for White, African American, Asian, Other, and Unknown. The table contains 11 rows of data, including measures like Venous Thromboembolism Prophylaxis, Intensive Care Unit Venous Thromboembolism Pr..., Safe Use of Opioids - Concurrent Prescribing, Elective Delivery, Cesarean Birth, Severe Obstetric Complications, and various SDOH measures. A callout bubble points to the table with the text: "When your performance differs from the overall rate, alerts provide visual cues."

	CMS ID	TJC ID	Measure Name	Overall Rate	White	African American	Asian	Other	Unknown
	CMS108v9	eVTE-1	Venous Thromboembolism Prophylaxis	90.93%	92.63%	89.34%	87.44%	-	-
	CMS190v9	eVTE-2	Intensive Care Unit Venous Thromboembolism Pr...	99.01%	100%	97.23%	100%	-	-
	CMS506v3	eOPI-1	Safe Use of Opioids - Concurrent Prescribing	9.93%	12.43%	9.34%	8.69%	-	-
	ePC01v9	ePC-01	Elective Delivery	38.46%	37.45%	39.45%	36.56%	-	-
	ePC02v2	ePC-02	Cesarean Birth	49.50%	53.52%	46.67%	33.33%	-	-
	ePC07v1	ePC-07	Severe Obstetric Complications	21.74%	21.25%	22.22%	21.08%	-	-
	SDOH-1		Screening for Social Drivers of Health	95.92%	96.55%	95.84%	94.58%	-	-
	SDOH-2		Screen Positive Rate for SDOH - Food Insecurity	2.13%	3.15%	1.99%	1.58%	-	-
	SDOH-2		Screen Positive Rate for SDOH - Housing Instability	1.96%	2.25%	1.78%	1.50%	-	-
	SDOH-2		Screen Positive Rate for SDOH - Transportation N...	3.09%	4.02%	2.88%	2.65%	-	-
